

# WOMEN'S size chart

If the body measurement is on the borderline between two sizes, go to the lower size for a tighter fit or the higher size for a looser fit.

**Measurement Guidelines** \*We recommend another person to take an individuals measurements to ensure accuracy.

**Chest:** Ask the individual to stretch arms out horizontally to enable the tape to be placed around the fullest part of the chest and ensure it goes horizontally across the back of the body and across the shoulder blades. To take the measurement, ask the individual to now relax the arms at the side of the body - keep the tape horizontal and taut (not tight, just firm) to take the measurement.

**Waist:** Measure around the narrowest part of the waist - if the individual bends from side to side this is the waist, keep the tape horizontal and taut (not tight, just firm) to take the measurement.

**Hip (Bottom):** Ask the individual to stand with feet together, measure around the widest part of buttocks, keep the tape horizontal and taut (not tight, just firm) to take the measurement.
